## Keeping You Up & Running with a *Daily Health Check*™

We take a completely different approach than other support companies in this city. Rather than waiting for you to discover problems and call us, we're proactive and find small problems before they become big calamities – saving you hours of downtime and frustration.

Now we're introducing our *Daily Health Check Service* that checks your systems every single morning before you start work. We're able to nip problems in the bud before – not after – they disrupt your business.

**Our Daily Health Check™ includes:**

✓ Automatic check of your backup	✓ Automatically checks your email systems each morning
✓ Ensures your disks are in good health	✓ Checks your AV program's pattern file
✓ Checks for Hacker attacks	✓ Checks the Critical Events in your event logs

**And to keep you informed, our system will send you a short note every morning to confirm the checks we've done and the results.** You'll see clear evidence of the value we deliver each and every day.

### **Daily Health Check™**

Maximizing your uptime for less than the price of a cup of coffee per day.
