## A Revolutionary Change in Computer Support

BCPlus IT Support takes a different approach to computer support. Rather than just respond to problems after the fact, we use our state-of-the-art automated systems to check your systems proactively every 5 or 15 minutes. We'll nip problems in the bud before – not after – they disrupt your business.

### Does your computer support company:

- ✓ Keep you safe by **automatically checking your backup every day?**
- ✓ Keep you up & running by **automatically checking your event logs** first thing every morning?
- ✓ Keep you in contact by **automatically checking your email systems** every morning?
- ✓ Keep you running by **checking your Windows services, TCP ports and network connections** every few minutes?
- ✓ Keep you safe by checking for **hacker attacks?**
- ✓ Keep you safe from harm by **automatically checking your anti-virus systems** each and every day?
- ✓ ***And do they do all these things automatically – with an advanced Network Care Plan that doesn't get sick, distracted or go holiday?***

BCPlus IT Support conducts dozens of checks on your systems every five or fifteen minutes. We can spot many problems before they occur. And we'll get instant alerts about others – usually before you know you have a problem – so we can fix them before you experience the pain of downtime.
